SCIENTIFIC JOURNAL

FOUNDED IN 1975

Vol. 47, No. 4

L'viv 2004

CONTENTS

<i>Kyrchei I. I.</i> Representation of generalized inverse Moore–Penrose matrix by analog of classical adjoint matrix	7
<i>Andriychuk V. I., Zdomska L. M.</i> On the Selmer group of elliptic curve	13
<i>Mazurenko N. I.</i> Absorbing systems in the Hilbert cube related to Hausdorff and covering dimension	18
<i>Antonova T. N., Hladun V. R.</i> Some sufficient conditions for convergence and stability of branched continued fractions with alternating partial numerators	27
<i>Vozna S. M.</i> Newton–Tile-type interpolational formula in the form of two-dimensional continued fraction with non-equivalent variables	36
<i>Kushnirchuk Yo. F.</i> Solvability of non-homogeneous generalized hypergeometric equation	42
<i>Kalenyuk P. I., Nytrebych Z. M., Drygaś P.</i> Method of solving the Cauchy problem for evolutionary equation in Banach space	46
<i>Solomko A. V., Sharyn S. V.</i> Functional calculus over Banach spaces in cone \mathbf{R}_+^n	51
<i>Antoniouk A. Vict.</i> Regular properties of semigroups, generated by nonlinear flows on manifolds	56
<i>Antoniouk A. Val.</i> Nonlinear estimates on regularity of differential flows on manifolds	63
<i>Vityuk A. N.</i> Existence of solutions of differential inclusions of fractional order in the space of summable functions	72
<i>Borodin V. A., Samoylenko V. Hr.</i> Asymptotic properties of solutions to the n -th order differential equation with impulses	76

<i>Evtukhov V. M., Stehun A. A.</i> Asymptotic representations of unbounded solutions for non-linear differential equations of the third order	82
<i>Makhney O. V.</i> Expansion of singular differential operator by eigen-functions	88
<i>Balabushenko T. M., Ivasyshyn L. M.</i> Fundamental matrices of solutions of polynomial sheaf of elliptic systems, generated by parabolic system	95
<i>Vlasij O. D., Goy T. P., Ptashnyk B. Yo.</i> Problem with non-local conditions for weak-nonlinear equations with variable coefficients in main part of operator	101
<i>Ivasyshyn S. D., Medynsky I. P.</i> Local solvability of Cauchy problem for quasi-linear $\vec{2b}$ -parabolic systems with weak degeneration on initial hyperplane	110
<i>Ilkiv V. S.</i> Non-local boundary-value problems for partial differential systems in Sobolev spaces of infinite order	115
<i>Kohut I. V.</i> Solving a non-local boundary-value problem for homogeneous system of partial differential equations by means of differential-symbol method	120
<i>Lopushanska H. P., Chmyr O. Uu.</i> On solvability of the first boundary-value problem for equation $u_t = \Delta u + u ^{\beta+1}$ in the class of generalized functions	125
<i>Malytska A. P.</i> On fundamental solution of Cauchy problem for degenerated according to arbitrary number of groups of variables of parabolic Kolmogorow-type equation of any order	131
<i>Pasichnyk H. S.</i> On the Cauchy problem for dissipative $\vec{2b}$ -parabolic systems	138
<i>Pukalsky I. D.</i> Cauchy problem for parabolic equations with power degeneration	144
<i>Pukach P. Ya.</i> Mixed problem in unbounded domain for weakly nonlinear hyperbolic equation with growing coefficients	149
<i>Symotiuk M. M., Medvid O. M.</i> Problem with distributed data for linear partial differential equations	155
<i>Perun G. M.</i> Dirichlet problem for linear stochastic equation of parabolic type with continuous perturbations	160
<i>Vasiunyk Z. I., Datsko B. Yo.</i> Classification of spatially-inhomogeneous solutions in the system of reaction-diffusion type based on self-organizing algorithm	166
<i>Popovych V. S., Tokovyy Yu. M.</i> Construction of solution to the plane thermoelasticity problem for a thermosensitive strip	172
<i>To the 75-th birth anniversary of O. M. Kulyk</i>	180
