

CONTENTS

<i>Andriychuk V. I.</i> On weak approximation in linear algebraic groups over pseudoglobal fields ...	7
<i>Dzhalyuk N. S., Petrychkovych V. M.</i> On solutions of matrix polynomial equations and on similarity of matrices	14
<i>Zelisko V. R., Shchedryk V. P.</i> Matrix of values on a system of roots of diagonal elements of matrix and its applications	20
<i>Komarnitskiy M. Ya., Melnyk I. O.</i> On axiomatizability of a class of noncommutative Prufer rings	30
<i>Shavarovskii B. Z.</i> On similarity of collection of matrices and on quasi-diagonal equivalence of matrices	38
<i>Prokip V. M.</i> On common divisors of matrices over factorial domains	43
<i>Fedorchuk V. M., Fedorchuk V. I.</i> On functional bases of the first-order differential invariants of continuous subgroups of Poincaré group $P(1,4)$	51
<i>Kysil' T. M.</i> Strong factorial elements of duo-domain	59
<i>Gutik O. V., Livach Yu. M.</i> Embeddings of semigroups into nilpotent-generated semigroups.....	66
<i>Zrum O. V., Skaskiv O. B.</i> Wiman's inequalities for entire functions of two complex variables with rapidly oscillating coefficients	78
<i>Filevych P. V., Fedynyak S. I.</i> On a relation between the maximum modulus, the maximum modulus of derivative and central index for entire functions.....	88
<i>Kuzakon' V. M.</i> Calculation of differential invariants of the second-order submersions for Euclidean spaces	95
<i>Andrusjak R. V.</i> Global solvability of Stefan inverse hyperbolic problem	100
<i>Derete' Ye. V.</i> Asymptotically optimal weight cubic formulas for some classes of functions of many variables	113
<i>Dmytryshyn R. I.</i> On convergence of multidimensional g -fraction with non-equivalent variables	121
<i>Savenko P. O., Tkach M. D.</i> Approximate method for solving two-dimensional Hammerstein type integral equations arising in the radiating systems synthesis problems.....	128
<i>Shcherbyna N. M., Zhuk M. V.</i> Combined algorithm for solution of linear two-dimensional boundary-value problem	133
<i>Meleshko V. V.</i> Thermal stresses in rectangular plates.....	140
<i>Savruk M. P., Osyechko A. M.</i> Interaction of arbitrarily placed cracks with wedge cut under antiplane strain	165
<i>Moysyeyenok A. P., Popov V. G.</i> Stress concentration near thin elastic inclusion under the action of non-stationary longitudinal shear wave	172
<i>Nahirnyj T. S., Tchervinka K. A.</i> Stressed-strained state and strength of locally inhomogeneous layer during heating process	178
<i>Kalenyuk P. I., Michuda O. Ya.</i> Variational model of nonlinear mechanics for inertial elastic systems	184
<i>Nikolaev A. G., Barakhov K. P.</i> Some types of physical fields in the cone with heterogeneity as a spherical segment	191
<i>Dudzinski Ju. M.</i> Acoustic-hydrodynamic sensor models of fluid cavitation threshold.....	199
<i>Tchaban V. Yo.</i> Unified equations of electrodynamics	205

NEW ITEMS AND INFORMATION

To the memory of Petro Stepanovych Kazimirski	210
