MATHEMATICAL METHODS and PHYSICOMECHANICAL FIELDS

SCIENTIFIC JOURNAL

FOUNDED IN 1975

Vol. 55, No. 1

L'viv 2012

CONTENTS

<i>Antonova T. M., Sus' O. M.</i> On Formula of difference for one of the figured approximants of two-dimensional continued fractions	7
<i>Podilchuk I. Yu.</i> On maximum error at approximation of non-rational functions from resolvent integral operators by branched continued fractions	19
<i>Pozdnyakova I. V.</i> Semigroups of endomorphisms of some infinite monounary algebras	29
<i>Ilika S. A., Cherevko I. M.</i> Approximation of nonlinear differential functional equations	39
<i>Tokovyy Yu. V.</i> Reduction of 3D elasticity problem for a finite-length solid cylinder to solution of systems of linear algebraic equations	49
<i>Kaminsky A. A., Selivanov M. F., Chornoivan Y. O.</i> Model of growth and coalescence of two co-linear cracks in viscoelastic body	61
<i>Pasternak Ia. M., Vasil'ev K. V., Sulym H. T.</i> Antiplane deformation by concentrated factors of finite solids with cracks and rigid inclusions	72
<i>Sushko O. P.</i> Thermoelasticity state of a solid with two coplanar thermally active circular cracks	84
<i>Dovbnya K. M., Yartemyk V. V., Gordienko M. M.</i> Elastic-plastic orthotropic shell with internal crack of arbitrary configuration	95
	5

<i>Andreykiv A. Ye., Kit M. B., Khyl S. V.</i> Mathematical modeling of fatigue fracture of plates with cracks under block loading	103
<i>Mykhas'kiv V. V., Kalynyak O. I., Hrylyts'kyy M. D.</i> Nonstationary problem of elastic wave incidence on compliant disk-shaped elliptic inclusion	113
<i>Shamrovskii A. D., Merkotan G. V.</i> Solution of coupled thermoelasticity problem on distribution of non-stationary waves in half-space	122
<i>Nahirnyj T. S., Boyko Z. V.</i> Research of size effects in thin fibres	130
<i>Senchenkov I. K., Oksenchuk N. D.</i> Modeling of nonisothermal flow with accounting dependence of plastic properties on material microstructure . . .	138
<i>Lila D. M., Martynyuk A. A.</i> On instability of a rotating elastoplastic composite plane circular disc	145
<i>Sheptilevskiy A. V., Kosenkov V. M., Selezov I. T.</i> Three-dimensional model of hydroelastic system confined by spherical shell	159
<i>Nazarchuk Z. T., Synyavskyy A. T.</i> Approximate solution of an inverse scattering problem for a plain dielectric structure with perfectly conducting base	168
<i>Chernukha O. Y., Pelekh P. R.</i> Stationary processes of heat conduction in bodies of randomly inhomogeneous structure	179
