L'viv 2018

CONTENTS

National Academy of Sciences of Ukraine is celebrating 100 years	7
<i>Baranetskiy Ya. O., Kalenyuk P. I., Kopach M. I.</i> Nonlocal multipoint problem for partial differential equations with constant coefficients of even order . . .	11
<i>Ivasyshen S. D., Pasichnyk H. S.</i> Ultraparabolic equations with infinitely growing coefficients in a group of minor terms and with degenerations on the initial hyperplane	31
<i>Malytska H. P., Burtnyak I. V.</i> Degenerate parabolic system of diffusion type with inertia	47
<i>Holovata O. M., Mulyava O.M., Sheremeta M. M.</i> Pseudostarlike, pseudoconvex and close-to-pseudoconvex dirichlet series satisfying differential equations with exponential coefficients	57
<i>Povstenko Y. Z.</i> From chemical potential tensor and concentration tensor to non-local continuum theories	71
<i>Zuyeva T. I.</i> Influence of dissipation on the vortex motion in the rotating Bose – Einstein condensates	86
<i>Matsyuk R. Ya.</i> Relativistic mechanics of constant curvature	101

<i>Yankovskii A. P.</i> Refined model of thermo-elastic-plastic bending of layered plates of regular structure. I. Problem statement.....	116
<i>Makhorkin M. I., Nykolyshyn M. M.</i> Limit equilibrium of cylindrical shell with longitudinal crack taking into account the material inertia	130
<i>Fesenko A. A., Moysenok O. P.</i> An exact solution to a nonstationary problem for an elastic layer with a cylindrical rigid inclusion	142
<i>Kurpa L. V., Shmatko T. V.</i> Investigation of free vibrations and stability of functionally graded three-layer plates by means of the R -functions and variational methods	155
<i>Shopa T. V.</i> Vibrations of an orthotropic doubly-curved panel with a set of openings of arbitrary configuration under mixed-type boundary conditions.....	173
<i>Chekurin V. F., Postolaki L. I.</i> Application of the variational method of homogeneous solutions for determination of axisymmetric residual stresses in finite cylinder	186
