SCIENTIFIC JOURNAL FOUNDED IN 1975

Vol. 61, No. 3 L'viv **2018**

C O N T E N T S

Shchedryk V. P. Classification of parametric solutions of matrix one-sided equations by the transforming matrices of their characteristic matrices 7

Gutik O. V., Sobol O. Yu. On feebly compact semitopological semilattice $\exp_n \lambda$ 16

Hart E. L., Hudramovich V. S. Projective-iterative schemes for the implementation of variational-grid methods in the problems of elastoplastic deformation of inhomogeneous thin-walled structures 24

Kit H. S., Andriychuk R. M. Boussinesq's functions of the 3d thermoelasticity problems for half-space At the action of a heat source or thermal dipole . . 40

Kushnir R. M., Zhydyk U. V., Flyachok V. M. Thermoelastic analysis of functionally graded cylindrical shells 45

Yasinskyy A. V., Tokova L. P. Optimization of steady-state thermal displacements in a plane-deformed half-space by means of external thermal loading 54

Gristchak V. Z., Gristchak D. D., Dyachenko N, N. An effective approximate analytical solution to the stability problem of a three-layer conical shell under combined loading 63

Guk N. A., Kozakova N. L. Transmission of the three-dimensional basis of normal loading 78

Vasil'ev K. V., Sulim G. T. The direct cutting-out method in the problems of elastic equilibrium of anisotropic bodies with cracks under longitudinal shear 89

Opanasovych V. K., Nylolyshyn M. M., Slobodyan M. S., Alfavitska S. O., Bilash O. V. The compatible action of bending with the tension of an isotropic plate containing a crack without contact of their tips and with taking into account plastic zones and material strengthening 101

Maksymovych O. V., Solyar T. Ya., Kempa Ya. Investigation of bending of anisotropic plates with inclusions based on singular integral relations . . . 111

Bilushchak Y. I., Chernukha O. Y. Modelling of heterodiffusion processes in two ways with cascade decay of admixture particles. I. Initial-boundary value problem by cascade kind 122

Kurennov S. S., Poliakov A. G., Barakhov K. P. On the two-dimensional stressed state of the adhesive joint of the rectangular plates. The nonclassical problem 132

Makhnenko O. V., Kostenevich E. S. Mathematical simulation of microstructure phase transformations at welding heating by example corrosion resistant cladding of the reactor vessel VVER-1000 139
