SCIENTIFIC JOURNAL

FOUNDED IN 1975

Vol. 63, No. 2

L'viv 2020

CONTENTS

<i>Fedorchuk V. M., Fedorchuk V. I.</i> On the classification of symmetry reductions for the (1+3)-dimensional Monge – Ampère equation	7
<i>Isariuk I. M., Pukal's'kyi I. D.</i> Internal and start controls of solutions of the boundary-value problem for parabolic equations with degenerations	17
<i>Tokibetov J. A., Abduakhitova G. E., Kaparova R. M.</i> On one representation of generalized holomorphic vector via derivatives of harmonic functions . . .	29
<i>Savenko P. O.</i> Methods of implicit functions in the solution of multiparameter nonlinear spectral problems	36
<i>Pelykh V. O., Taistra Y. V.</i> Peculiarities of angular distribution of electromagnetic radiation from the Kerr black hole	51
<i>Andriychuk M. I., <u>Voitovych M. M.</u>, Tkachuk V. P.</i> Application of the generalized eigenoscillation method for solving the scattering problems on the nanostructures	59
<i>Grigorenko Ya. M., Rozhok L. S.</i> On the equilibrium of non-thin cylindrical shells with a dent	72
<i>Loveikin A. V.</i> Plane potential field outside the symmetric T-shaped contour . . .	83

<i>Piskozub Y. Z., Sulym H. T.</i> Effect of surface stresses on the antiplane stress-strain state of thin ribbon-like interphase inclusion	98
<i>Serednytska Kh. I.</i> Thermal stress state of a bimaterial with interface crack filled with compressive fluid	109
<i>Protsiuk B. V.</i> Non-stationary heat conduction problems for thermosensitive plate with nonlinear boundary condition on one of the surfaces	117
<i>Harmatii G. Yu.</i> Numerical determination of unsteady thermal state of a three-layer hollow heat-sensitive cylinder under complex heat exchange	129
<i>Yankovskii A. P.</i> Modeling of heat transfer in composite bodies reinforced with tubes with swirlers through which the twisted liquid heat-transfer agent moves in turbulent regime. I. Statement of the problem	137
<i>Yankovskii A. P.</i> Modeling of heat transfer in composite bodies reinforced with tubes with swirlers through which the twisted liquid heat-transfer agent moves in turbulent regime. II. Model problem	150
