# MATHEMATICAL METHODS and PHYSICOMECHANICAL FIELDS

SCIENTIFIC JOURNAL FOUNDED IN 1975

**Vol. 66, No. 1-2** **L'viv 2023**

**C O N T E N T S**

*Bondarenko V. M., Styopochkina M. V.* Classification of the posets of minmax types which are symmetric oversupercritical posets of the eighth order . . 5

*Shavarovskii B. Z.* On the triangular form of a polynomial matrix of simple structure and its invariants with respect to semi-scalar equivalence . . . . . 16

*Prokip V. M., Mel'nyk O. M., Kolyada R. V.* On divisibility with remainder of polynomial matrices over an arbitrary field . . . . . 23

*Fedorchuk V. M., Fedorchuk V. I.* On partial preliminary group classification of some class of the (1+3)-dimensional Monge – Ampère equations. I. One-dimensional Lie algebras . . . . . 40

*Buhrii O. M., Buhrii N. V., Kholyavka O. T.* Hyperbolic Stokes system of the third order with variable exponent of nonlinearity . . . . . 48

*Pukal's'kyi I. D., Yashan B. O.* Problem with impulse effect for $2b$-parabolic equation with degeneracy . . . . . 63

*Chernukha O. Yu., Chuchvara A. E.* Modeling diffusion processes in a two-phase strip with randomly distributed spherical inclusions located near boundaries of the body. II. Quantitative analysis . . . . . 73

*Loveikin A. V.* Plane potential field outside a symmetric rectangular cross . . . . . 85

*Sulym H. T., Pasternak Ia. M., Vasylyshyn A. V.* Thermomagnetoelectroelasticity of finite bimaterial bodies in the presence of a bonding interlayer of high thermal conductivity and internal thin inhomogeneities . . . . . 98

*Hart E. L., Terokhin B. I.* Finite element analysis of stress concentration in thin plates and cylindrical shells with a circular hole surrounded by an inclusion of a functionally graded material . . . . . 118

*Solyar O. I.* Axisymmetric contact problem with regard for friction and wear . . 129

*Ostryk V. I.* Receding of an elastic weighty strip from a rigid base under the action of a normal concentrated force . . . . . 141

*Orynyak I. V., Kulyk K. A., Mazuryk R. V.* 3*D* analysis of the geometrically nonlinear deformation of beams by the method of basic helical elements . . . . 158

*Zvizlo I. S., Stankevych N. V.* Torsion crack in a bimaterial with different types of contact boundary conditions on interface . . . . . 170

*Popov V. G., Kyrylova O. I.* Iterative method for determining the stress state under the action of waves on a system of cracks . . . . . 178

*Zhuravlova Z. Yu.* Mechanical response of a semi-infinite poroelastic cuboid to an external load . . . . . 188

*Drebotiy R. H., Shynkarenko H. A.* Heuristic choice of the regularization parameter for optimal stabilization of the finite element approximations . . . . . 206

*Bogdanov V. L., Grigorenko O. Ya., Malanchuk V. O., Sorochenko G. V., Tormakhov M. M., Holubieva I. M., Ostapko O. I.* Comparative analysis of the area of the external surface of dental implants . . . . . 222

*Baranovsky S. V., Bomba A. Ya.* Identification of the parameters of infectious disease model taking into account sorption therapy under the conditions of diffusion perturbations . . . . . 230

*Maksymuk O. V., Vasylkiv I. M., Sachuk Yu. V.* Contact interaction of periodic punch of arbitrary form with elastic foundation with two bedding coefficients . . . . . 242

*Revenko V. P.* Solving axisymmetric thermoelasticity problems through the use of complete sets of non-orthogonal functions . . . . . 249

*Trofymchuk O. M., Kaliukh Iu. I., Berchun Ya. O., Marienkov M. G., Khymenko B. O., Tytarenko V. A., Vapnichna V. V.* A hybrid numerical method for evaluating the building seismic protection based on digital twins . . . . . 259
