**CONTENTS**

---

Storozh O. G., Szuvar O. B.

Some spectral properties of even order differential-boundary operators in the space of vectors-functions

7

Fedorchuk V. M., Fedorchuk V. I.

Differential invariants of the first order of the splitting subgroups of the generalized Poincare group

16

Leiko S. G., Sami Al-Hussin

Rotary quaziconcircular diffeomorphisms on the (pseudo)Riemannian spaces

22

Pasichnyk T. V., Sjavavko M. S.

Regularization of fractional analytical representation

28

Balins'kyj A. I., Podlevs'kyj B. M.

Bezout mapping and connection between Hermite's and Lyapunov's methods in stability theory of the polynomials

36

Tatsiy R. M., Mazurenko V. V.

Discrete-continuous boundary value problems for quasi-differential equations of even order

43

Bereznytska I. B.

Inverse problem for a parabolic equation with non-local overdetermination condition

54

Pukhals'kyj I. D.

Green's function of unlocal linear problem and the problem of optimum control

63

Podilchuk I. Yu.

On some properties and transformation formulas of resolvent integral operators of viscoelasticity

	71
Zolochovsky A. A., Rvachev V. L., Sklepus S. N. Variational-structural method in creep problems	80
He Ji-Huan Generalized nonlinear elasticity theory of quasicrystals	86
Protsiuk B. V., Syniuta V. M. 3D thermolasticity problem for uniformly heated piecewise-homogeneous half-space	89
Vihak V. M., Tokovyi Yu. V. Determination of solution to plane elasticity problem in rectangular region in the case of orthotropic material	97
Shevchenko V. P., Dovbnya K. M. Boundary integral equations system for orthotropic shell with arbitrary configuration slit	103
Kryven V. A. Doubly periodic elastoplastic problem of the longitudinal shear of the body with a rigid rhombic inclusion	109
Holyboroda I. M. Description of irreversible deformation, elastic deformation and deformation of thermal expansion of polycrystalline under reversible martensitic transformations	114
Povstenko Yu. Z. Straight dislocations, disclinations and line forces in nonlocal medium	124
Povstenko Yu. Z. Straight dislocations, disclinations and line forces in nonlocal medium	124
Grycyna Ā. R., Nahirnyj Ò. S. Influence of surface curvature and admixture on the surface tension in a sphere	130
Mishchenko V. Ā. Investigation of wave beams propagation in elastic media by series expansion in Gaussian functions	135
Yemets' V. F.	

Iterative method for solving the exterior problems for time-harmonic elastic waves	139
Gachkevich A. R., Musiy R. S., Mel'nyk N. B.	
Thermomechanic response of hollow cylinder with the impulse electromagnetic effect	146
Gafiychuk V. V., Datsko B. Yo., Vasiunyk Z. I.	
Investigation of different types of bifurcation in the systems of reaction - diffusion type	155
Lavreniuk V. I., Kabysh Yu. Ā.	
Fundamental solutions for two-component elastic mixtures	161
Shevchuk P. R., Galapats B. P., Shevchuk V. A., Osipov V. V.	
Influence of thickness and linear adhesion of lacquer-paint coatings on their longevity in sea water	169
Grits'ko E. G., Zhuravchak L. M., Shumilina N. V.	
Interpretation of non-stationary filtration flow at determination of geometric parameters of non-conductive inclusion	174
