PIDSTRYHACH INSTITUTE OF APPLIED PROBLEMS OF MECHANICS AND MATHEMATICS

Scientific Journal
"MATHEMATICAL METHODS and PHYICOMECHANICAL FILDS"

Year 2002, Vol.45

Vol. 45, No.4, L'viv 2002

Dedicated to the 75-th birth anniversary of Professor Vitaliy Yakovych Skorobohat'ko

CONTENTS

Pelykh V. O., Ptashnyk B. Yo.

To Professor V. Ya. Skorobohat'ko 75-anniversary of birhday 7

List of scientific publications of V.Ya.Skorobohat'ko 10

Balabushenko T. M., Ivasyshen S. D.

On properties of solutions of $2\vec{b}$-parabolic systems in unbounded on time-variable domains 19

Barabash H. M., Lavrenyuk S. P., Protsakh N.P.

Mixed problem for semi-linear ultraparabolic equation 27

Burak Ya. Yo., Kalenyuk P. I., Michuda O.Ya.

Dynamical processes in elastic systems allowing for nonlinear coupling effect of the distinct motion forms 35

Burak Ya. Yo., Moroz H. I.

Mathematical problems of nonlinear mechanics of elastic systems 40

Vihak V. M., Tokovyy Yu. V., Yershov Yu. G.

Spectral problem for integro-differential equation second order with integral conditions 47

Hnatyk B. I., Petruk O. L.

Radiative blast waves from point explosion in nonuniform medium 53

Hoyenko N. P.

Convergence of the expansion of the ratio of Lauricella functions F_D into branched continued fraction

61

Ivanchov M. I.

Free boundary problem for diffusion equation in a rectangle

67

Ivasyshen S. D., Medyns'kyy I. P.

Properties of integrals which have a type of derivatives of the volume potentials for $2\vec{b}$-parabolic systems with degeneration on the initial hyperplane

76

Il'kiv V. S.

Two-point nonlocal boundary value problem for a system of nonhomogeneous partial differential equations

87

Kalenyuk P. I., Nytrebych Z. M.

Application of the generalized scheme of separation of variables for specifying self-adjoint extensions of minimal operator

95

Matsyuk R. Ya.

Technologies of Kawaguchi in application to the Skorobohat'ko space

102

Symotyuk M. M.

Multipoint problem for linear systems of partial differential equations

107

Sus' O. M.

Analogue of Stern–Stolz theorem for two-dimensional continued fractions

119

Chaplya Ye. Ya., Chernuha O. Yu.

Diffusive processes in a body with regular structure

124

Kolodyazhny V. M., Shevchenko A. O.

The numerical schemes of measure determination for the geometric measurable objects

132

Lopushansky O. V., Zagorodnyuk A. V.

New subspaces of polynomials and analytic functions on Banach spaces

138
